

Mission Statement

Our mission is to design and implement a comprehensive volleyball team management system that enhances both team performance and event operations while supporting the broader growth and experience of volleyball events.

First and foremost, The primary mission of this system is to provide a centralized hub for player and team data, recording statistics, victories, defeats, and player rankings to provide transparent and reliable performance tracking. This will equip coaches and managers with the insights needed to make informed decisions, monitor progress, and optimize team development. In addition, it supports game analytics and strategy by offering detailed summaries of match outcomes, historical comparisons, and trend analysis, enabling teams to plan effectively, evaluate performance, and make data-driven strategic decisions.

Second, the system will also handle important operational functions such as ticket sales, match scheduling, tournament queue management, and sponsor coordination. It will organize fixtures, ensure fair game allocation, facilitate online and offline ticket sales with seat management and attendance reporting, and track sponsorship agreements along with revenue, expenses, and fundraising activities. This information will help improve the event planning, produce revenue opportunities, and promote the partnerships with sponsors.

Finally, by unifying these features within a single platform, our project seeks to improve organizational efficiency, foster transparency, and build a more connected and vibrant volleyball team community.

Core Objectives:

1. Player & Team Performance Tracking

Objective	Description
Player & Team Performance Tracking	Record player statistics, victories, defeats, and team rankings to provide transparent and reliable performance data.

Game Analytics & Strategy Support	Provide summaries of match outcomes, historical comparisons, and trends to assist in game planning and decision-making.
--	---

2. Match Scheduling & Queue Management

Objective	Description
Match Scheduling & Queue Management	Organize match fixtures, handle tournament queues, and ensure fair allocation of games and resources.

3. Financial Management

Objective	Description
Ticketing System	Facilitate online and offline ticket sales, manage seat allocation, and generate attendance reports.
Sponsorship & Financial Management	Support sponsor registration, track sponsorship agreements, and maintain records of revenue, expenses, and fundraising activities.

4. Data Security & Role-Based Access

Objective	Description
Data Management & Security	Protect sensitive data (e.g., player profiles, sponsor agreements) while providing role-based access for different stakeholders.
